What Our Customers  
Are Saying

“With Project Insight, you can be a very seasoned project manager and get tremendous benefit from the tool, or be a business person and get the information you need easily without diving too deeply into project management materials.”

-- *Director of the Project Management Office*

Freedom Communications, publisher of *The Orange County Register*

“Initially we researched over 200 solutions. We extensively evaluated four solutions. Ultimately, none of the other packages could do anything like what Project Insight could for the price.”

-- *Project Manager*

AGFA Global Services, leading graphics company

“We have eight product managers who are working on 30 projects simultaneously. Before Project Insight, milestones would slip on a project, but no one would check on it for a week or two. Now Project Insight automatically shoots off alerts for overdue milestones to team members. We're really able to maintain timelines in a way we could never do before, so it's a huge win.”

-- *CIO*

Funrise, manufacturer of Tonka trucks
